

Potter Creek

Eligibility Report Information:

- Classification: Wild
- ORV: Vegetation: narrowleaf cottonwood/strappleaf willow-silver buffaloberry riparian forest
- Segment Length – 9.82; 100% BLM-managed

Stakeholder comments & questions on BLM information:

- Some stakeholders would like to see Recreation and Wildlife added as ORV's.
- Does the creek cross private land near the confluence? *No – BLM verified after the meeting.*
- Get details on water rights -
- Get details on mineral leases – No current leases
- How close is the jeep/ ATV trail? *From Edd Franz, BLM after the meeting: The jeep trail between 7N Mesa and Potter Creek gets within 0.24 mile of Potter Creek. This should not be an issue because the "buffer" lands do not have to be exactly 0.25 mile on each side of the stream. The land just must average to 320 acres per mile.*

	ORV Needs	Current Uses & Values	Potential Future Uses	Current Problems/ Assets	Policy/Mgmt tools – options and impact
1	Wildness/habitat			Used to be a jeep/ log road; closed 25 years ago at DOW recommendation.	Citizen-proposed wilderness on both sides. CNHP- Roubideau Creek Potential Conservation Area
2	Flows	Water rights?		No diversions or impoundments	
3	Habitat quality			Russian knapweed problem	BLM sprays to control.
4		Grazing			
5		Hunting			
6		Hiking/ Recreation		Jeep/ATV trail
